

# POU CARTRIDGE FOR ARSENIC

## High Performance Point-of-Use Solutions

Adedge Technologies, Inc. is introducing two new POU cartridges for arsenic reduction. These products are the most cost-effective technology to date to meet the challenges of the new 10 micrograms per liter ( $\mu\text{g/l}$ ) drinking water standard for arsenic established by EPA. Products incorporate a proprietary iron oxide media for long life and high performance. Cartridges effectively reduce both Arsenic (V) and Arsenic (III) without pre-oxidation. Ideal applications include under-counter and countertop POU systems.

### CARTRIDGE PERFORMANCE

<b>Applications</b>	Ideal for Under-counter or countertop POU systems Model AD-2710S: 50 $\mu\text{g/l}$ of arsenic, 0.5 gpm flow, pH 6.5-8.5 Model AD-4510S: 100 $\mu\text{g/l}$ of arsenic, 0.5 gpm flow, pH 6.5-8.5
<b>Arsenic Reduction</b>	Reduction of up to 99% of total Arsenic Effective for both As (III) & As (V).
<b>Capacity</b>	1000 – 3,000 gallons; 4-6 times longer life than other commercial adsorption options (conservative rating at pH 8.5)
<b>Contaminants</b>	Primary: Arsenic Secondary: lead, chromium, cadmium, molybdenum, zinc, and antimony
<b>Certifications</b>	NSF 61 product listing on Media (see Adedge for details).
<b>Components</b>	FDA listed components
<b>Extractables</b>	Imparts no harmful chemicals into the treated product water

The standard Model AD-2710S has been optimized for extended life and fits most standard and slimline 10-inch housings. The AD-2710S is designed to treat 50  $\mu\text{g/l}$  of total arsenic to less than 10  $\mu\text{g/l}$ . (based on pH 8.5, Arsenic (V) challenges using NSF 53 protocols). The AD-4510S version is a 4.5x10-inch BB size cartridge designed for tackling higher arsenic concentrations above 50  $\mu\text{g/l}$ . Both are filled with 100% Adedge Technologies AD-33L arsenic reduction media for maximum performance.
